Hindhuja Global Solutions Pvt Ltd. (February 17, 2020 - April 16, 2021)  
Front-end developer

- Worked on technologies like JavaScript, CSS, HTML, React Js.
- Helped teams with debugging tasks on different projects.

## PROJECTS

### Mail Box Client Application

Created a mail box application where users can login , send and receive messages

- Frontend - HTML, CSS, JS, React JS, Redux.
- In this, user can send and receive mails. Each user has their own account and users cannot access other users data.
- Implemented GET/POST/PUT requests to rebase in order to retrieve user speci c information for each user.
- Responsive web design using CSS and HTML.

 <https://github.com/sinchana123456/Mail-Box-Client>

### Expense Tracker

Created an expense tracker where a user can sign up and login, add and remove expenses and also download the expenses.

- Frontend - HTML, CSS, JS, React JS, Redux.
- It allows user to track their expenses and premium users can get extra bene ts.
- Users can download their expense in csv format.
- Users expenses data is protected using authentication method.
- Implemented rebase real-time data to manage data at backend.
